

*Note: the system learns from what you have told it before, therefore asking it "what is a plant" will now return an answer

*To get similar output ask it something else it does not know

*Also based on the highly randomized nature of the output, the system may return slightly different output

User: hi

Robotalk: Greetings.

User: how are you today?

Robotalk: Very well.

User: what is your name?

Robotalk: My name is robotalk.

User: what is my name?

Robotalk: Can you answer, what is my name?

User: my name is Tim

Robotalk: Right.

User: what was my name?

Robotalk: Your name is tim.

User: i like you

Robotalk: I would love you back but i dont have emotions.

User: that sucks

Robotalk: Yup.

User: what is a plant?

Robotalk: I am not sure, what is a plant?

User: it is green

Robotalk: Thanks.

User: what is a tree?

Robotalk: A tree is green.

User: thats right!

Robotalk: Huh?

User: right is the same as correct

Robotalk: I will remember that.

User: thats right!

Robotalk: Awesome.

User: goodbye robot!

Robotalk: Goodnight living being.
